Experience

GeniTeam Solutions

Lahore, Pakistan

Associate Software Engineer

December 2023 - Present

- KW APP:
 - Built a service marketplace app with React.js, Node.js, and Socket.IO, featuring role-based permissions and dynamic job management.
 - Integrated a 20km radius job-bidding system and utilized GitHub for streamlined development.
 - Beginning with your most recent position, describe your experience, skills, and resulting outcomes in bullet form.
- Angular Apps:
 - Transformed a complete Figma design into an Angular-based frontend with integrated websockets for a medical app, ensuring pixel-perfect implementation.
 - RXJS was utilized for state management and interfaces were defined for proper type definition.
- MetaRoyale:
 - Developed a blockchain-interaction for Vanilla JS application to provide an immersive decentralized experience. Utilized Reown Appkit and WalletConnect for secure wallet integration and seamless blockchain interaction.
 - Designed features to mint custom ERC-20 tokens (MR Tokens) and implemented NFT (ERC-1155 Tokens) purchasing using the MR Tokens, to enhance **user experience (UX)**.
